

DRACON-ELTRON

# Cooling

## Our Knowledge for you

### The company

For thermal solution systems, Adda is recognized as a thermal management expert.

ADDA's wide range of products includes CPU cooler modules, blower fans, Dc axial-flow/blower fans and Ac axial-flow fans. Featuring award-winning design, ADDA products meet the rigorous requirements of our customers and users, and are easily modified for varying applications and specifications

### DC fan

- Higher airflow, static pressure and torque
- Reduction of noise and power consumption
- Patented Hypro bearing for longer life
- Additional output functions are available.

### AC Fan

- Powerful CFM with higher torque
- Optimized blade design for best performance
- Long life with patented Hypro bearing
- Full range of different dimension

### Blower

- Low start-up voltage, low power consumption
- Current automatically shutdown protection and restart function
- Special function output available, like PWM design control circuit
- Patent back-incline blades design for high airflow efficiency
- Excellent turbine centrifugal wind-out tunnel design.

### Chip cooler

### Mini blower

### Bracket Fan

CHIP COOLER

STANDARD DC FAN

METAL FINGER GUARD 9 CM

STANDARD AC FAN

BLOWER

BRACKET FAN

MINI BLOWER

Beside cooling products Dracon-Eltron offers 8 technology groups with product lines and services which make production and your product more reliable and more efficient. We offer you within these core areas an optimum of service.

- **Connection:** cable- en PCB connectors, cable assembly and hotmelt overmoulding.
- **Mechatronics:** servo-motors and servosystems, micromotors, transmissions, power supplies and special connectors.
- **Printing/Identification/Power:** POS, kiosk and thermal printer mechanisms, lcd, card readers, power supplies, PTC heaters and specials.
- **Soldering and cleaning:** usage material; solder material, cleaning towels and swaps, brushes and protection materials. PCB-services for cleaning and coating.
- **Plastics:** connection products, enclosures, cables, cable guides, shrink sleeves, PCB spacers.
- **Machines:** Machines for cable processing industry such as stripping, cutting, winding and overmoulding machines. PCB-production and rework such as cut and bending machines, soldering station, equipment for dispense and rework.
- **EMC/EMI:** We help to minimize the impact of electromagnetic interference. Depending on the application and the possibilities we thereby apply technique as filtering, grounding, shielding and absorption. One after the other sophisticated techniques which ask for an in-depth recommendation.
- **Tools and workstation:** We gladly advice you the correct tool and the optimum workshop institution for your production and application.
